Message from the Guest Editors

The Sustainable Development Goals (SDGs) are a universal call of the United Nations for action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity. The 12th Goal—responsible consumption and production—points out that achieving economic growth and sustainable development requires that we urgently reduce our ecological footprint by changing the way we produce and consume goods and resources. The present Special Issue goes beyond direct intervention policies. It attempts to analyze the actions of all market actors and highlight their role focusing on the connection of environmentally responsible food consumption with agricultural production.

This Special Issue focuses on the guidance of production by environmentally responsible consumption. More specifically, it encourages research and review manuscripts that analyze the guidance of farm input suppliers, farmers, food producers, processors, whole-sellers, retailers, and service providers, through sustainable consumption. It also welcomes studies analyzing the role of NGOs and public policy interventions that facilitate the market actors that supply food to become greener.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2019).
